

Showstopper

Danity Kane feat. Yung Joc

you make my dreams come true
and I love all the small things that you do,
like blink 182
you make my days go better and the way
that the sun is shining through girl its all because of you and I know its tough right now but youll get it together
and just know that I am here through all kinds of weather
I wont ever leave your side day or night or whenever
but right now I gotta say that youre a
show stopper you are so hot and I cant get you off my mind
show stopper youre a jaw dropper
when I see you in the lights
you make everything alright
and I know that Id be fine if I had you you make me wanna dance
cuz im happy but just know that I cant dance
so im sorry in advance
and
you make the stars shine brighter and the way
that the moonlight hits ur eyes makes me wanna be your guy
and I know its tough right now now but youll get it together
and just know that I am here through all kinds of weather
I wont ever leave your side day or night or whenever
But at this moment I just wanna say, I just gotta say that youre a
show stopper you are so hot and I cant get you off my mind
show stopper youre a jaw dropper
when I see you in the lights
you make everything alright
and I know that Id be fine if I had you you make me feel like Im flying
no one can stop me from feelin
the way I do now no denying
that you got me goin and now Im falling
