

There's A Fire

Chris Altmann

Stop getting me off track
I mean it, there's a problem here
This time it is for, is for, is for, it is for real
How can I make myself more clear?I never say quite what I mean
And never mean quite what I say
And how did that get out of me
And what the hell did I mean to say?This time it is for real
This is a real emergency
This time I swear it is the, is the , is, is the truth
This must be dealt with urgentlyI never say quite what I mean
And never mean quite what I say
And how did that come out of me
And what the hell did I mean to say?There's a fire
There's a fireI, I really mean it now
This time I swear I have not lied
This isn't like the, like the, like the, like, like last time
I swear to God I have not liedI never say quite what I mean
And never mean quite what I say
And how did that get out of me
And what the hell did I mean to say?There's a fire
There's a fireThere's a fire
There's a fire
There's a fire
...
