

God Created Woman

[Teddy Douglas](#)

(with wynonna)

(lisa webb/bruce burch/franny romeo) It was a man's world for a day and a half

Adam had a garden for a bachelor pad

But something was missing in his paradise

Then along came eve, the apple of his eye

Without hesitation he gave into temptation

cause God created woman to raise a little cain

Gave her a softer side, put fire into her eyes to drive a man insane

He knew what he was doing, cause history has proven

Since God created woman man's never been the same

Old christopher columbus would have never set sail

Without a little push from isabel

Alexander graham invented the phone

So his wife could ring a bell when she wanted his home

Some feminine persistence can make a world of difference

cause God created woman to raise a little cain

Gave her a softer side, put fire into her eyes to drive a man insane

He knew what he was doing, cause history has proven

Since God created woman man's never been the same

It's all a part of the plan, for the good of every man

cause God created woman to raise a little cain

Gave her a softer side, put fire into her eyes to drive a man insane

He knew what he was doing, cause history has proven

Since God created woman man's never been the same
