

Throw Your Hands Up (Rec Room Remix)

Jump5

Are you ready? Get on up, are you ready? Throw your hands up and make some noise

Everybody get live and jump for joy

When I say reach, you touch the sky

From the front to the back, jump side to side Are you ready to get that feeling?

Do you know when the time has come?

There's a second of realizing

Then we're singing it all as one Everybody come on get on up

Altogether we move in time

(Are you ready?)

This is how you can know where your at

See you doing it with Jump5 Can you hear it getting louder?

The sound of noise increasing

A little piece of heaven now

This is the sound we're gonna raise the ceiling Can you hear it getting louder?

The sound of noise increasing

A little piece of heaven now

This is the sound Throw your hands up and make some noise

Everybody get live and jump for joy

When I say reach, you touch the sky

From the front to the back, jump side to side Throw your hands up and make some noise

Everybody get live and jump for joy

When I say reach, you touch the sky

From the front to the back, jump side to side Are you ready? Are you ready? Get on up Do you wanna be with me dancing?

Are you gonna be by my side?

Never stop, we'll keep on moving

Are you ready to take this ride? Doesn't matter where you come from

Doesn't matter what place your in

(Are you ready?)

Yeah, it's the time to get on

Hear the rhythm and you begin Can you hear it getting louder?

The sound of noise increasing

A little piece of heaven now

This is the sound we're gonna raise the ceiling Can you hear it getting louder?

The sound of noise increasing

A little piece of heaven now

This is the sound Throw your hands up and make some noise

Everybody get live and jump for joy

When I say reach, you touch the sky

From the front to the back, jump side to side
Throw your hands up and make some noise
Everybody get live and jump for joy
When I say reach, you touch the sky
From the front to the back, jump side to side
Throw your hands up and make some noise
Throw your hands up
Throw your hands up and make some noise
Get on up, put your hands in the air
Jump5 is getting down so you better beware
Gotta do it like this, see you do it like that
Do it side to side from the front to the back
See you kick it see you ride the groove
Do it any way you want but I gotta see you move
If you got it going on then you'll never get enough
If you wanna get down throw your hands up
Can you hear it getting louder?
A little piece of heaven now
This is the sound we're gonna raise the ceiling
Can you hear it getting louder?
The sound of noise increasing
A little piece of heaven now
This is the sound
Throw your hands up
Throw your hands up and make some noise
Everybody get live and jump for joy
When I say reach, you touch the sky
From the front to the back, jump side to side
Throw your hands up and make some noise
Everybody get live and jump for joy
When I say reach, you touch the sky
From the front to the back, jump side to side
Throw your hands up and make some noise
Everybody get live and jump for joy
When I say reach, you touch the sky
From the front to the back, jump side to side
Throw your hands up and make some noise
Everybody get live and jump for joy
When I say reach, you touch the sky
From the front to the back, jump side to side
