

Another Song

Swell Maps

I wanna spend some time with you
Not now, but just another day
It's much more fun just playing games
With someone else's face

No one waiting for my show
It's still the second game
No commitment, token drifting
Round and round, still E-T-C

I wanna live my life with you
Not really, just sounds good
A word to say to pass the time
'Til all the trains have gone

Just to spend some time with you
Not now, but just another day
No more waiting, you can't control it
But everything is really great

This is just another song
I guess, it's rather long
This is just another song
And now it's gonna stop
