Self Help (G-Force Remix)

Criteria

"Self Help" by CriteriaThe sightless leading the blind
You confuse and scare the masses to get behind
Because the world's stern
But you chose to fight instead and not to learnWho you kill don't change:
You killedHow hard is it to say, "I make mistakes?"
We cannot pretend to dance around the cover-up.
If this ain't no sin to say you never heard
Well then one lies into anotherWho protects citizens from presidents?Nations will try to remind us
Don't begin what you can't end
Somebody out there can fight us
But instead we close our eyes and go to
War, it don't work
It frustrates the cause, it's making it worse.Peace, love, understanding
It's as simple as it sounds if you believeLeaders will try to blind us
But open minds still see
Officials addicted to crisis
Detoxified with peaceThey make war, it don't work
It frustrates the cause, it's making it worse
