

My Favorite Wine Is Tequila

Michael Franti & Spearhead

Sometimes you got to let go, go, go, go (yeah)
Sometimes you got to let go, go, go, go
(This is the song about my favorite kind of wine)
Sometimes you got to let go, go, go, go
Just like you
Sometimes you got to let go, go, go, go You know your love is like a drug to me
And every time your close to me it makes me kinda lose my mind
There's not a worry in the world when I'm rolling with ya girl
And the hours seem to float on by
And every time you dance in front of me I feel dizzy like tequila running through my brain
The only thing I fear in life is if your with me everyday I'd be intoxicated all the time But baby I've been lonely
(I've been lonely, so lonely)
Remembering my time with you
So maybe to remind me
You know I just may have a glass or two 'Cause my favorite wine,
Is tequila
It makes me fell fine, just like you girl (just like you), just like you Pour me a cup of that sweet sweet tequila
One for me and my seÃ±orita
One for my enemies, one for my homies
One for the people who passed on before me
No hurry no girl, kiss me only
Like tequila, sip it slowly
Pass me a cup, so we can fill it up
We love until the break of dawn But baby I've been lonely
Remembering my time with you
So maybe to remind me
You know I just may have a glass or two 'Cause my favorite wine (my favorite wine, girl)
Is tequila
It makes me fell fine, just like you You know your love is like a drug to me
And every time your close to me it makes me kinda lose my mind
There's not a worry in the world when I'm rolling with ya girl
And the hours seem to float on by
And every time you dance in front of me I feel dizzy like tequila running through my brain
The only thing I fear in life is if your with me everyday I'd be intoxicated all the time 'Cause my favorite wine
(my favorite wine girl)
Is tequila
It makes me fell fine (it makes me feel so fine, so fine) just like you
'Cause my favorite wine (just like you)
Is tequila (just like you)

It makes me fell fine just like you girl (tequila running through my brain)
