MelÃ©

Pay attention, stop playing for regret
Fossil resources all used up
Make the best use of your time
You could be on to something
Too skeptic, too tired to care
When they all seem to know at once
Sweet muse left me all alone
There's only dead weight left
Euthanasia could be the greatest gift
It's all the same so let me know
It's never changed so let it go
It's all the same so let it go
It's just what you
Save the long car ride home, don't leave your house today
Nothing lost but still nothing gained, gained, gained, gained
No possibilities all wasted, all gone over
Life means I hear my ears ring one more day, day
And you will see through at once
Sweet muse she won't be around today
Things that I could not say
Are you through yet? Are you gone yet?
You're not, phase in, phase out
Cross your heart, crash, burn and fall
Under cushions hide the change so no one knows
Just be careful who you tell
I really want to care when you say, "I'll change that"
Just don't feel a thing when you say, "We'll get there someday"
