Long Distance

Turin Brakes

Well, if this gets ugly, I'd swear
This ain't our last chance
The vultures that circle my head
Are flying alongsideThe world's turningI let somebody get under my skin
Long distance losin' is all that I've seen
Now there's a river, now there's a riverNothing can save me, my reserve betrayed me
It calmed the hurricanes
I'm burning to get there, the middle of nowhere
Storm warnings flicker whileThe world's turningI let somebody get under my skin
Long distance losin' is all that I've seen
Now there's a river, now there's a riverI let somebody get under my skin
Long distance losing is all that I've seen
Now there's a river, now there's a river
