Light of Day

Tommy Stinson

We'll always make it through the day
There's always gonna be a better way
Always be someone else's way
Even when we know we've gone too far
Closer to the edge is so much further
Than we'll get without a carAnd everyone's looking for some place
They're just killing more time than space
Some nights I wish that the sun would never show its faceYou're so beautiful at night
The moon's got a way of lighting you
The way no picture is ever going to
Even when the stars begin to weep
We'll laugh at the expense of all their grief
You never made me feel like I'm a creepAnd everyone's looking for some space
We're just killing time all over this place
Some nights I wish that the sun would never show its faceWouldn't want to face the light of day
With anyone like I'll face the night with youJust look at everyone
No one really knowing why they're here
Trying so hard not to disappear
Doesn't take a lot to make you dance
We're making such a scene with two left feet
Never even sing or hear the beatAnd everyone's looking for some place
They're just killing more time in haste
Some nights it feels like the moon is just a light above our graves
