

# Every Song Is You

## The Partridge Family

Magazines and afternoon dreams get me through the day  
And till the night can smile for the people as I sing and I play  
I left home, it seems like a century ago  
I never thought I could miss anybody so, but now I know  
Everywhere I go, everything I do, every song is you  
Searched my mind just to find something I always knew  
Everywhere I go, everything I do, every song is you  
Searched my mind just to find something I always knew  
Every song is you  
Singing man with a six-piece song band, answer to my dreams  
And every time I sing without you, how lonely it seems  
I love you now like I never loved you before  
Each day that goes by, I find that I want you so, I need you more  
Everywhere I go, everything I do, every song is  
you  
Searched my mind just to find something I always knew  
Everywhere I go, everything I do, every song is you  
Searched my mind just to find something I always knew  
Every song is you
