

Galaxies

Hadara Levin Areddy

Through the galaxies
Through the galaxies
Through the galaxies
Through the galaxies
Through the galaxies
Through the galaxies
Through the galaxies

Call back the cap-com, tick off the time bomb

Let felicity fly

Armor the airlock, blanket the bedrock

And kiss the planet goodbye

Dear God, I was terribly lost

When the galaxies crossed and the sun went dark

But dear God, You're the only North Star

I would follow this far

Through the galaxies
Through the galaxies
Through the galaxies
Through the galaxies
Through the galaxies
Through the galaxies
Through the galaxies

Fight back the flight deck, bring on the breakneck

Cue the solar eclipse

Summit the sunset, dovetail the dragnet

And blow your backbone to bits

Dear God, I was terribly lost

When the galaxies crossed and the sun went dark

But dear God, You're the only North Star

I would follow this far

Oh telescope, keep an eye on my only hope

Lest I blink and be swept off the narrow road

Hercules, you've got nothing to say to me

'Cause you're not the blinding light that I need

For He is the saving grace of the galaxies

He is the saving grace of the galaxies

Dear God, I was terribly lost

When the galaxies crossed and the sun went dark

But dear God, You're the only North Star

I would follow this far
I would follow this far
Through the galaxies
Through the galaxies
