

The Dead Next Door

Billy Idol

Watch the sky
For a reason why
I will say
Sunday it was part
Monday is none
Monday was none
For the dead next door One pair of silent terror reins
And we're the dead next door The heat of the day
Fade, fades away
Fades into the night
The heat of the day
Suffering a wedding
Suffering away
For the dead next door
You see One error, silent terror reins
And we're the dead next door In animal land
When dark is in command
One thing you should know
Don't hear that knocking
Don't eat out of their hand
Those stumble die
You see
Those dumb cry They see you, you and me
You and me
With the dead next door
You and me
With the dead next door
You and me
With the dead next door
You and me
With the dead next door
