

Leave Us Alone

Endo

First things, first let the mindset flow
First things, first let the mindset flow
First things, first let the mindset flow
First things, first let the mindset flowLeave us alone
It's not what you think
Leave us alone
It's not what you thinkAnimals let down like the cannibals
Leave us alone
It's not what you think the fireBig guns are for hire
Fuck what you say
We do what we feelPickin' it up off the down low
Making sure systems go
Breakin' it off with the endoLeave us alone
It's not what you think
Leave us alone
It's not what you thinkI drop the bomb and the bomb set go
I drop the bomb and the bomb set go
I drop the bomb and the bomb set go
I drop the bomb and the bomb set goLeave us alone
It's not what you think
Leave us alone
It's not what you thinkLeave us alone
