Dandelion Necklace

SayWeCanFly

1, 2, 3, 4...*guitar intro*You understand the way I think
You see my life for what it is
Not for what it could have beenI could talk for hours with you
About the little things like why the sky is blue
Or how much I love the moonAnd sure we have our awkward times
But that's what keeps it cute
Because it makes me happy just to be with you
Just to be with youCHORUS:
I know I'm just that boy who writes the love songs
But when I sing, you make the harmony to go along
And I promise I will try my best to keep our love alive
Oh, because I love to see you smileSome might say that love can be expensive
But I'm sure that you and I can prove that wrong
I'd be happy with a dandelion necklace
Because I know that it would come straight from your heart
I know that it would come straight from your heart, straight from your heartCHORUSI love to see you smile x 3CHORUSI love to see your smile
