

Vessel

Devilskin

One more vessel down to wash your motive clean,
Take the poison, raise it up and speak to me.
The road ahead right now is long, but it's hard to tell
For once I was a person, but now I'm just a shell

I'll take this broken glass and warm up my insides
For all my dreams are forgotten once I arise
I'll take this broken glass and warm up my insides
For this vessel, pour this vessel
Takes me higher, one more inside

One more vessel down to warm what you have seen
Shake this poison, pour that glass, now give to me
The road ahead right now is long, so take higher ground
For once I was considered dirt, but I was just a sound

I'll take this broken glass and warm up my insides
For all my dreams are forgotten once I arise
I'll take this broken glass and warm up my insides
For this vessel, pour this vessel
Takes me higher, one more inside
Come take me higher, one more inside
Higher, higher

One shot to kill, you know I need this
One shot to kill, to feel this love in me
One shot to kill, you know I need this
One shot to kill, to feel this love in me

One more vessel down to wash your motive clean,
Take the poison, raise it up and speak to me.
The road ahead right now is long, but it's hard to tell
So pour this vessel, pour this vessel

Takes me higher, one more inside
Come take me higher, one more inside
Higher, higher
One more round!
