

# Blue Beyond

Trisha Yearwood

When we were together I knew that forever  
Id always, my days  
Follow you into the blue beyond Dream with one another  
Help each other over the rainbow  
You know Id follow you into the blue beyond Never wanna be anywhere I cannot see  
The love light you shine  
Only wanna be wherever you are runnin with my friend You never will be lonely  
You need only look right behind you  
To find who will follow you into the blue beyond Never wanna be wherever I cant see  
The love light you shine  
Only wanna be wherever you are walkin hand in hand Dream with one another  
Help each other over the rainbow  
You know Id follow you into, Id follow you into  
Id follow you into the blue beyond
