## **Pills**

## **Gary Jules**

I've taken all my pills But I'm still not sleepy Tried to trick myself into thinking That I'm not awake That it's only a dream Put that cigarette out Don't ask me no questions Salome dancing on my wall And the shadows on the floor Look so warm from here I've seen it all before Just one little lie But the difference is this It meant the world to me Don't ask me no questions "Take the wheel" she said "as I wander" We could leave this town I've got all I need: spirit, hope and joy But no one knows me I think I lost my pills Guess I'll take my chances I'm looking at the telephone But nothing happens I am well aware That the morning is near Put the radio down Don't ask me no questions
