Stress In Marriage

Negativland

Turn on the dishwasher. The blender. The electric can-opener. And you can be in pain. Then your wife comes in to talk, and you can't hear her. And she thinks you're not paying attention. Or giving you the cold shoulder. There's enough built-in stress in marriage ... without noise contributing. There's enough built-in stress in marriage ... without noise contributing.
Is there any escape ... from noise?
Is there any escape ... from noise?
Is there any escape ... from noise?
Is there any escape ... f
rom noise?
