

# Valentine Moon

## Jools Holland his Rhythm & Blues Orchestra

The first time you kissed me at the end of our street  
The gas lamps shone above us, young lovers we'd meet  
But the old town has gone now and it's winter too soon  
Still we waltz beneath our valentine moon

The streets and the market and the old dog and bell  
We've gone through the changes, we've lived our lives well  
But the old town is gone now and it's winter too soon  
Still we waltz beneath our valentine moon

Valentine moon, valentine moon  
We danced together as old lovers do  
Valentine moon, valentine moon  
We'll always remember our valentine moon

Cette fois que tu m'embrasse, au bout de notre rue  
Les lampes de gaz nous allumiere, toi et moi jeunes amants  
But the old town is gone now and it's winter too soon  
Still we waltz beneath our valentine moon
