

Together We Will Stand

Jennifer LaMountain

TOGETHER WE WILL STAND

In this dark hour, freedom's light still shines
And in our hearts, we find a hope to carry on
Together we can dream our dreams
Through every trial, still it seems
Our tears bring brighter vision
Of a better day to come

CHORUS:

America is still the promised land
With one heart and voice, together we will stand
Our flag still waves, reminding us again
God will guide our way
Take my hand
Together we will stand

Every opportunity, this legacy of liberty
A gift to you and me
Because a price was paid in blood
Out of ashes heroes rise, to show us a by their sacrifice
Courage is the cornerstone, our freedom's built upon

America is still the hero's land
With one heart and voice
Together we will stand
Freedom's flag still waves
Reminding us again
God will guide our way
Take my hand
Together we will stand
Together we will stand.
