

# Outside

Gary Chapman

It's safe and it's warm inside this sanctuary  
Where we come to worship, to witness and marry  
But after we've gathered I have to confess  
My soul feels a restlessness to take this remarkable light  
Outside where people are hurting  
Suffering and searching for some place to hide  
Inside God pulls us together from a world torn apart  
To carry the love in our hearts, outside  
It's time to leave self-centered thinking behind us  
Expecting the whole world to seek out and find us  
Jesus is making us people who care and if we will be willing to share  
These graces can be multiplied  
Outside where people are hurting  
Suffering and searching for some place to hide  
Inside God pulls us together from a world torn apart  
To carry the love in our hearts, outside  
Outside where people are hurting  
Suffering and searching for some place to hide  
Inside God pulls us together from a world torn apart  
To carry this love in our hearts  
Outside where people are hurting  
Suffering and searching for some place to hide  
Inside God pulls us together from a world torn apart  
To carry this love in our hearts  
Outside, outside  
Let's all go outside  
We got to take the love outside  
Outside, outside, outside, outside
