Infected

Alexa Vega

I'm infected, I'm infected by your genetics
Shilo, I'm the doctor
Shilo, I'm your father
Shilo, that was close
Take your medicine
I'm infected by your genetics
Shilo, you're my patient
Shilo, be more patient
You have limitations
Don't go chasing flies
I must be protective
You cannot be reckless
That's what is expected
When you are infected
I'm infected by your genetics, I'm infected by your genetics
And I don't think that I can be fixed
No, I don't think that I can be fixed
Tel me why, oh why are my genetics such a bitch?
It's this blood condition
Damn this blood condition
Mother, can you hear me?
Thanks for the disease
Now I am sequestered
Part of the collection
That's what is expected
When you are infected
That's what is expected
When you are infected
That's what is expected
When you are infected
How much of it's genetics?
How much of it is fate?
How much of it depends
On the choices that we make?
He says I have her eyes
Do I also inherit his shame?
Is heredity the culprit?
Can I stop it or am I a slave?
I'm infected by your genetics, I'm infected by your genetics

What hope has a girl who is sick? Why dream of a life past this fence?
It really makes no difference 'cause I know that I'll never be fixed
Tell me why, oh why are my genetics such a bitch?
But oh, I want to go outside, outside
But oh, I want to go outside, outside
