

# Is One Moon Enough?

**Jack Johnson**

Is one moon enough?  
If i can see with my cheap telescope  
Bet my neighbor has two or three  
Down soon enough  
what does it mean  
If every time I look up  
I see them  
Laughing down on me? Take that moon or break across the sea  
Everything I want's just out of reach  
Is one moon enough  
Well, it used to be  
When I could see with my own naked eye  
She was smiling down on me  
Is one ever enough  
How could it ever be if my neighbor has more than me  
And my moon  
Just out of reach Take that moon or break across the sea  
Everything I want is further from me Moon down soon enough  
Now I can see a million moons that think of  
Me and my moon  
Is always following me  
Take that moon or break across the sea  
Everything I want's just out of reach  
Why's that moon always following me?  
Everything I want's just out of reach
