

# Already Have

## Case

You seem to think my love  
For you could some how pass  
'Cause I was told by friends  
About your scandalous past  
Wish you could see inside  
And know just how I feel  
We said the past was dead  
And I feel that way still  
And through this life we'll  
Walk together  
And I no longer search to try to find  
'Cause I already have you, baby  
I already have what I want  
I already have what I need  
You're beautiful inside and out  
And baby you've got to believe  
I already have what I want  
I already have what I need  
You're my number one, the only one  
And baby you've got to believe  
Lady, I know that I am not  
A perfect man  
But show what's best I can  
Exactly where you stand girl  
I can't even look no more  
I know I found true love  
So sorry if I made it seem like love have faded  
You will never walk alone baby  
And through this life we'll  
Walk together  
And I no longer search to try to find  
'Cause I already have you, baby  
I already have what I want  
I already have what I need  
You're beautiful inside and out  
  
And baby you've got to believe  
I already have what I want  
I already have what I need

You're my number one, the only one  
And baby you've got to believe  
Leaving you alone, sending you without your love  
It's not an option I could see  
A choice that's right for me  
'Cause lady you know I belong to you  
Don't wanna live no more  
'Cause living is that you are gone  
You're in my heart, you're in my soul  
I feel you deep down, way down deep in my soul  
I already have what I want  
I already have what I need  
You're beautiful inside and out  
And baby you've got to believe  
I already have what I want  
I already have what I need  
You're my number one, the only one  
And baby you've got to believe  
I already have what I want  
I already have what I need  
You're beautiful inside and out  
And baby you've got to believe  
I already have what I want  
I already have what I need  
You're my number one, the only one  
And baby you've got to believe  
I already have what I want  
I already have what I need  
You're beautiful inside and out  
And baby you've got to believe
