

World Inside Your Head

Cull

Take the world inside your head
Take the world inside your head
Feel it better when you're dead
Take the world inside your head
Inside, worlds collide
I get clues
Rights to choose
Who I'll be
Suddenly I am home
Away from home
Take the world inside your head
Take the world inside your head
Feel it better when you're dead
Take the world inside your head
Take the world inside your head
Take the world inside your head
Take the world inside your head
Take the world inside your head
Take the world inside your head
