I Want I Want

Digitalism

As if it was so easy to go
I wanted something special before
And everything you want is to know
Who is waiting for me anymore

The days are getting longer now
In futuristic silence
Does anybody, anyhow
Care about anything?

Now, if you've lived in channels before
And you entered the light, somehow
What do you say?

Am I not always be wanting this?
Am I not always be wanting this?
Am I not always be wanting this?
Am I not always be wanting this?

Now, if it was so hard not to return
Why shouldn't I come back?
A few things in my head is a concern
It's because I lost track of you

Here in, it's the people, the past
Waiting on the other side
Funny in a sudden way
You found me, here

In the light
So, please take me out
And put the light on

Am I not always be wanting this?
Am I not always be wanting this?
Am I not always be wanting this?
Am I not always be wanting this?

Am I not always be wanting this?
Am I not always be wanting this?

Am I not always be wanting this?
Am I not always be wanting this?
