

Reek of Putrefaction

Rotten Sound

[Carcass cover]Snorting the stench of latent effluvium
And maturing damp fumes
This foul menage forces tears to your eyes
As the corpse's gas are exhumed....
Intoxicated by foul body odours
And the nauseating tepid whiff
Pinching your nostrils as you irrigate flatus
From the emaciated stiff...
Volatile entrails fume and steam
As they're meticulously hacked during dissection
Evaporating sludge and bubbling pus -
A rotten gaseous expiration...
Maturing corpse, the stale smell of decay and rot
- A sickening asphyxiation
Gross remains gush, innards turn to sludge
- With partial liquefaction...
Smell the rot...
Of the corrupted corpse....
Hallucinogenic trip...
Tissue gases leak - a warm, unpleasant reek
A quite macabre addiction
Deteriorated, bloated corpse - decomposure burning hot
Sniff the smell of carrion...
Inhaling the dank smells
As you gouge out the dripping innards with glee
Succumbing to a translucent state
As you sniff the aroma of necropsy...
Bacterial decomposition
The aroma of fungal/larval infestation
Consuming, ripening slime
As the cadaver is slowly wasting...
Your sore sinews rot, blood curdling coughs
As acrid foetor corrodes your lungs
Body orifices clenched in your teeth
As you frenziedly try to insert the bungs...
Swollen, ripened corpse, the stench of crusting clots
- The smell of stale perspiration
Administering watery gore, you're screaming out for more
- Addicted to putrefaction....

Snort the corpse...
Get high on the rot...
Orgasmic rush...
Turns your brains to pus...
