Long Long Long

Yim Yames

On the long, long lashes of your look
The one you give that says you love me
You don't even have to say you love me
I was long gone long before that look
But now that it's a party of my life
It's by far the best party of my life
I could live on your love and nothing else if i had to
On the long thin fingers of dawn
The ones we let wrap around us
Now that happiness has found us
I did not have strength to carry on
But I have got strength to spare now
I have come up for air nowI could live on your love and nothing else if I had to
I could live on your love and nothing else if I had to
I could live forever, I could conquer anyone
I could probably fly out of this place
I could make a circle around the sun
I could be so far away that I would be a memory
But every time I hold you in my arms
There's no other place I'd rather be
I could live on your love and nothing else If I had to
I could live on your love and nothing else If I had to
And nothing else if I had to
