Harbor

Cute Is What We Aim For

She should've known from the start
Her heart was my favorite part
She should've known from the start
(I told ya)
I'm better than the beach
Beneath her feet
When she thinks of sweet
She thinks of me
I'm better than the street
Beneath her car
Learned everything in the backseat
Ain't it funny how things are?
She should've known from the start
Her heart was my favorite part
Overthrow the status quo
Never listen to the lingo
She should've known from the start
Her heart was my favorite part
Fell in love with a keptomaniac
Stole my heart and she never gave it back
(The twist goes like this)
Like a harbor starves for a ship
I await the arrival of her lips
She's starboard side
She's well equipped
I'm in the ocean
Causin' commotion
She should've known from the start
Her heart was my favorite part

Overthrow the status quo
Never listen to the lingo
She should've known from the start
Her heart was my favorite part
Fell in love with a keptomaniac
Stole my heart and she never gave it back
I fell in love with a keptomaniac
Stole my heart and she never gave it back
I fell in love with a keptomaniac

Stole my heart and she never gave it back
(What you think about that, what you think about that,
what you think about that?)
I fell in love with a keptomaniac
Stole my heart and she never gave it back
(What you think about that, what you think about that?)
I want to thank her
For being my anchor
No matter the weather
She'll be my tether
She should've known from the start
Her heart was my favorite part
Fell in love with a keptomaniac
Stole my heart and she never gave it
She should've known from the start
Her heart was my favorite part
Fell in love with a keptomaniac
Stole my heart and she never gave it
She should've known from the start
Her heart was my favorite part
I fell in love, I fell in love
She should've known from the start
