

# Most High (Remix)

## Messiah Tha Clover King, Lost Angel & ThinIce

Yo, if you don't know what the love means to me  
Things change and rearrange, friends aren't friends anymore  
People go behind your back to score on anything  
Will we ever have peace? Someone tell me please  
Now you will see on the block, kids playin' hearin' gunshots  
Never phased by the crimes that they witness  
Follow me and come and see how I got this way  
Young mama right there  
Don't be cussin' at your kids right there  
Put the right foundation right here, teach respect  
So they can be, most high, most high  
Most high, most high, most high  
Like an angel in the sky  
Most high, most high, most high  
Like an angel in the sky  
Brother why you act that way?  
(Why you actin' that way?)  
Call your girl woman not her name  
Bringin' kids in the world unclaimed  
You should know that don't make you a man at all, not at all  
Young father out there, listen up  
Don't abandon your seed out there, show we care  
Let's get one thing clear, for real  
Family should be, most high, held high  
Most high, most high  
Like an angel in the sky  
Most high, most high, most high  
Like an angel in the sky  
It doesn't matter where you are  
You're still a shinin' star, for real  
It doesn't matter where you're from  
(It doesn't matter where you're from)  
Let's give love to everyone  
(Start showin' more love)  
Hustlers put down your guns, put 'em down  
Self respect is the best weapon  
Spread love show your real value  
Set a true example by startin' with you  
See them kids right there  
Don't be shootin' 'round them kids right there  
Gotta show there is hope out here  
Train yourself you can be most high  
Start showin' more love  
Most high, most high, most high  
Like an angel in the sky  
Most high, most high, most high  
Like an angel in the sky  
It doesn't matter where you are  
You're still a shinin' star  
It doesn't matter where you're from  
Let's give love to everyone

Start showin' more loveMost high, most high, most high  
Like an angel in the sky  
Most high, most high
