

# Before We Were Born

## The dB's

I'm telling you right now nothing's gonna change your fate  
Are you ready for the news?  
It's hidden in the words I sing and chords I read  
I've got a feeling that I knew you before we were born  
Before we were born Wind whistles around your door, lightning roars across the night  
I'll be there when you wake, to paint the blue back on the sky  
And dry your eyes  
I've got a feeling that I knew you before we were born  
Before we were born It's only  
A dream now  
Come on down  
I knew you before we were born  
Before we were born  
I've got a feeling that I knew you before we were born  
Before we were born
