Make That Move

Shalamar

Make that move right now, baby
Make that move right now, baby

So many times
By holding back I let the good things pass me by
And then one day I asked myself the reason why
And like an answer from above you came into my life

And showed me one thing for sure
With love nothing is certain
You got to go for it when you feel it
Everybody, everybody needs somebody to love
And I choose you, baby, so let's

Make that move right now, baby
You only go out once in a lifetime
Make that move right now, baby

So natural to
Give in to feelings deep inside when love is due
And I knew something was missing 'cause I feel brand new
And motivation's in my heart whenever I'm with you

So girl whatever you do
Just remember love is a motion
You got to hold on tight
When you know it's right
Everybody, everybody needs somebody to love
And I choose you, baby, so let's

Make that move right now, baby
You only go out once in a lifetime
Make that move right now, baby
The longer you wait on love, the more you'll be without it

Why don't you
(Make that move) (Make that move) Make that move
(Make that move) (Make that move) Make that move
(Make that move) (Make that move) Make that move
(Make that move) (Make that move) Make that move

Let's make that move

(Make that move) (Make that move) Make that move
(Make that move) (Make that move) Make that move
(Make that move) (Make that move) Make that move
Come on
Let's make that move

So many times
By holding back I let the good things pass me by
And then one day I asked myself the reason why
Like an answer from above you came into my life

And that showed me one thing for sure
With love nothing is certain
You got to go for it
When you feel it
Everybody, everybody needs somebody to love
And I choose you, baby, so let's

Make that move right now, baby
You only go out once in a lifetime
Make that move right now, baby
The longer you wait our love, the more you'll be without it

Make that move right now, baby
Make that move right now, baby
Make that move right now, baby
Make that move right now, baby

Make that move right now, baby
Make that move, you've got to make that move
Make that move right now, baby
Come on, baby, come on, pretty baby

Make that move right now, baby
I just want you to make that move right now
Make that move right now, baby
If you make that move with me, I'll be yours eternally

Make that move right now, baby
Make that move right now, baby
Make that move right now, baby
Make that move right now, baby
