

# Stick Together

## The Superjesus

I know what I'm facing and what I'm facing don't know me  
And I'll wait and I'll tell you once again  
If you only gave the guidelines, I'd be better off knowing when  
I'd be better off knowing when Burning the candle is all I can handle  
We'll save energy if we stick together  
Taking you over a shy Casanova  
We'll save energy if we stick together  
Now, stick together now I've seen what I'm doing and what I'm doing is best for me  
And it's all gotta go before we're done  
It's the only kind of opinion that I could give to anyone  
I could give to anyone Burning the candle is all I can handle  
We'll save energy if we stick together  
Taking you over a shy Casanova  
We'll save energy if we stick together Burning the candle is all I can handle  
We'll save energy if we stick together  
Taking you over a shy Casanova  
We'll save energy if we stick together  
Now, stick together Know what you're coming for  
No need to tell you no more  
A little bit in store keeps us guessing Know what you're coming for  
No need to tell you no more  
A little bit in store keeps us guessing Burning the candle is all I can handle  
We'll save energy if we stick together  
Taking you over a shy Casanova  
We'll save energy if we stick together Burning the candle is all I can handle  
We'll save energy if we stick together  
Taking you over a shy Casanova  
We'll save energy if we stick together now  
Stick together now, stick together now  
Stick together now
