Shadows with a Hue

Nuance

Shadows with a hue
Guide the fate and know
That our color is something else
In a world that we've created
We seem so different

Shadows with a hue
Let us leave the pain
Then we know that we are there
In a space that's full of brightness
There is no way to fail

Just feel (just feel)
Now the ink of your soul with faith
Just feel (just feel)
Now the ink of your soul with faith

We have light in our hearts
Leave the fear and go again
To the start...
We have light in our hearts
Don't go back you'll never now what to wait for
Just go your own way

I just wanna a dream
With our paradise
Cold is just a point of view
Keep the promise till the darkness
There is a better life

Just feel (just feel)
Now the ink of your soul with faith
Just feel (just feel)
Now the ink of your soul with faith

We have light in our hearts
Leave the fear and go again
To the start...
We have light in our hearts
Don't go back you'll never now what to wait for

Just go your own way
