Fever Chill

Telekinesis

Nothing's free in your family tree, but when it's dark again, you can believe again
We were in love in another way, in another city, oh, oh, in another day
But when you look in my eyes, I start shivering
I get a fever chill, I get a fever chill
And I can see straight through to the other side where the winter's warm, but the sun don't shine
And I don't mind when you come undone, and I don't mind when you ask the question
And I don't mind when you talk to me in a foreign way, oh, like a foreign film
You sleep all night, I sleep all day, and it's a habit that won't just go away
And you're missin' all the things that you wanna see, that you wanna see, that you wanna see
And if you have another drink before it's off to bed, you won't really realize you're off your head
Stumblin' around with all your money spent, all your money spent, all your money spent
Your daddy always told you what you did was wrong, and mother wasn't there 'cause she was on the run
And now you're all alone and you can have your fun, you can have your fun, you can have your fun
(When we wake up, we wake up, oh, we wake up, when we wake up, when we wake up
When we wake up, we wake up, oh, we wake up, when we wake up, when we wake up, now)
And when you see me, you're gonna cry, you're gonna cry, oh, oh, when you see me, no, oh
When you see me, you're gonna cry, you're gonna cry, oh, oh, when you see me, no, oh
Nothing's free in your family tree, but when it's dark again, you can believe again
We were in love in another way, in another city, oh, oh, in another day
