

My Mamma Said

Aqua

We dreamed a dream - woke up and lived it

We had the music in our hands

The drops of rain - became a river

And now it's time to end this dance

- So thank you

My mamma said that the best thing in life

Was getting me

And loving somebody higher than anything

else in this world baby

My mamma said that she would give her

life up for me

My mamma said that the worst thing in life

Is getting used

to loving somebody higher than anything

else in this world baby

Knowing you're going to

Knowing you're going to - lose it all

Mamma don't leave - don't go

Don't run - don't hide - don't cry

Don't ever feel scared now

Mamma just crossed just crossed

To the parallel world

She crossed she crossed to the multiverse

Circling protons - all vibrations

Circling neutrons - all vibrations

Mamma just crossed just crossed to the parallel world

She crossed she crossed to the multiverse

And now you're lying there - taking your last breath

I'm holding back the tears - Oh mamma don't die

My mamma said...

Mamma hold on - give in - let go

Release yourself from everything out there

Mamma just crossed just crossed

To the parallel world

She crossed she crossed to the multiverse

Circling electrons - all vibrations

Circling electrons - all vibrations

Mamma just crossed just crossed to the parallel world

She crossed she crossed to the multiverse
And now you're lying there - taking your last breath
I'm holding back the tears - Oh mamma don't die
My mamma said...
