Halogen

Photek

I could be a shadow
In the light I'll be behind you
When the glow is shallow
There's a halogen inside you
It eclipses through me
When it's you I see, you I see
The ellipsis stills meAnd every turn I follow
We're dancing with our shadows
And every turn I follow
We're dancing with our shadowsRed sky narrow
Muted night and nothing comes through
Yeah I know I don't know
Couldn't care enough to try to
But you speak with lips sealed
It's just how I feel, how I feel
And the absence is too realAnd every turn I follow
We're dancing with our shadows
And every turn I follow
We're dancing with our shadows
[repeat]
