

Sugar (Archigram Remix) - Bonus

Ladytron

If I give you sugar, will you give me something elusive and temporary?

If I give you sugar, will you give me something elusive and temporary?

We've got the signal to leave you alone,

Off where we leave you and off where we find you.

If I give you sugar, will you give me something elusive and temporary? If I give you sugar, will you give me something elusive and temporary?

If I give you sugar, will you give me something elusive and temporary?

We've got the signal to leave you alone,

Off where we leave you and off where we find you.

If I give you sugar, will you give me something elusive and temporary? If I give you sugar, will you give me something elusive and temporary?

If I give you sugar, will you give me something elusive and temporary?

We've got the signal to leave you alone,

Off where we leave you and off where we find you.

If I give you sugar, will you give me something elusive and temporary?
