Whiskey Makes The World Go Round

Darryl Worley

Never was much of a drinking man
Just a good cold beer every now and then
But I met the boys last night at the Dead Dog Lounge
They talked me into a shot and I was feelin' fine
They said see what you been missing all this time
Whiskey makes the world go round
One led to another let me tell you brother
It aint no lie I went to sleep last night
with one foot on the ground
Cause whiskey makes the world
go round and round and round and round
I came to about ten to four
I was laying on the bathroom floor
I got up but I got right back down
That old rug started moving up under my feet
I put a big bear hug on that big white seat

Whiskey makes the world go round
One led to another let me tell you brother
It aint no lie I went to sleep last night
with one foot on the ground
Cause whiskey makes the world
go round and round and round and round
Every time I closed my eyes
the house would start to spin
I swore if I got out alive I'd never drink again
One led to another let me tell you brother
It aint no lie I went to sleep last night
with one foot on the ground
Cause whiskey makes the world
go round and round and round and round
