

# Remember the Fallen

## Sodom

Honor the fallen heroes, see their last resting place  
Perished in the battle of nations, where they found eternal peace  
Do you know the use of their decorations awarded for patriotism?  
They left their life in fire but don't know even why Remember the fallen  
Remember the fallen To the command of despotic dictators  
They marched to fight in a senseless war  
Most of them were just puppets and children  
The battle was lost before it began Brotherly in heart and hand  
Know that they never come back with combined effort  
And the believe in god their duty only as cannon fodder  
Kamikaze as living bombs, driven into the open knife  
Deceitful and malicious Remember the fallen  
Remember the fallen Their tormented souls will never rest  
To pay us back for their innocent death  
No quarter shed our proud blood  
Retaliation on the warpath
