Wake up with You (feat. Tony Momrelle)

The PB Underground

The first time that I laid eyes on you, girl
My life found a brand new meaning
Now I have tou right here in my world
I'm so greatful for everything that you are

So wonderful, my miracle
When you call my name, baby I come alive
My beauty queen, it's more than a dream
When you're laying in bed by my side

I can't wait to wake up with you, holding you tight
Doing things that lovers do, sweet love till sunrise
Girl you're my everything, the one I look to
And I just wanna say, I can't wait to wake up with you
Can't wait to wake up with you, girl

Listen, tonight, you're the center of attention
Tonight, gonna unblock the phone
It's all about you girl, cause your beauty is a perfection
Dim the lights, pour the wine and let's go

Take off your shoes
Relax your mind
Let me find a bed, girl, I wanna take my time
Turn the music low, let's just take it slow
Girl, there's nothing that I wouldn't do

You're my everything, the one I come home to
I can't live without you, I can't be without you
When the days through, I can't wait to wake up with you
