

# Long Night With You

Jake Owen

Tryin to keep that wolf at bay  
Twelve out of twenty-four hours a day  
I'm bustin' it, I'm breakin' my back Swing that hammer, stomp that shovel  
Boss man says, Boy, you're pullin a double  
It's always me, pickin' up the slack  
Nobody said it was easy But girl it's been a long hard day  
It seems we work our lives away  
Five o'clock I'm beat, dead on these two feet But girl when I come home to you  
The only thing I wanna do  
Is baby hold you tight cause all that gets me through  
After a long day is a long night with you One of those nights when we don't sleep  
The two of us fittin like a puzzle piece  
Turnin up the heat with the lights down low So go ahead honey and pour the wine  
I'm a little overdue for some overtime  
In your lovin arms, I ain't lettin you go  
Yet at night we'll take it slow an easy 'Cause girl it's been a long hard day  
It seems we work our lives away  
Five o'clock I'm beat, dead on these two feet But girl when I come home to you  
The only thing I wanna do  
Is baby hold you tight, cause all that gets me through  
After a long day is a long night with you Girl when I come home to you  
The only thing I wanna do  
Is baby hold you tight, cause all that gets me through  
After a long day is a long night  
Girl, it's been a long day and I'll need a long night with you Just a little bit longer baby  
Just a little bit longer with you
