

Didn't Bleed Red

Terrorvision

The aliens are coming wait for me I'm coming along it's right on

Yes they're coming wait for me while I get my gun bang bang

What'd you do that for they were only here to meet us you don't know

You don't know that they could've been coming to beat us

Didn't bleed red

Didn't bleed red

Didn't bleed red

Better off dead

Yes sir they've been sighted and we're putting down to land we're in command

They've been sighted I don't think they understand that's out of hand

What we do now then we were only here to tell them I don't know

Can't be too careful or go on what the hell then

Didn't bleed red x3

Better off dead x4

Didn't bleed red

They must be so inhuman when you hear of what they've done or so it's said

People hate them 'cos they say their blood is blue instead of red

What'd they do that for can't do anything to please them it must be true

Open all targets waiting for the season

Didn't bleed red x3

Better off dead x4

Didn't bleed red

They never asked for you to come

They never asked for us to stay

They never asked for our advice in any shape form or way

They never asked for you to come

They never asked for us to stay

They never asked for our advice in any shape form or way

The aliens are coming wait for me I'm coming along it's right on

Yes they're coming wait for me while I get my gun rat a tat tat

What'd you do that for they were only here to meet us you don't know

You don't know that they could've been coming to beat us

Didn't bleed red x3

Better off dead x4

They never asked for you to come

They never asked for us to stay

They never asked for our advice in any shape or form
