Half the Battle

Sicko

Timing is everything I said with a smile
maybe that's been your problem all along
it makes a difference in how you do
between coasting or just crashing through
some way some how somebody steered you wrong
It's only half the battle
I don't know the other half
that's not the point it's a figure of speech
It's only half the battle
but it's always worth a laugh
without it all the rest is out of reachYou'd think that knowledge would count for more than that
the end result of all that you discover
It maybe just a cliche
but you'll choke on it some day
if you can't get the words right
you're gonna suffer
