

All the Way Down

Verge of Umbra

ALL THE WAY DOWN

Intro

Here I sit with mad eyes and a sad soul
Itâ€™s you devotion, I wish I had more
Cause every time I try to grab hold
Plenum slips and slides out of control

Chorus

Steps I take to bring me close to peace, pushes me all the way to the edge; pushes me all the way down.
Steps I take to bring you back to me, pushes you all the way to the edge; pushes you all the way down.

Verse 1

My relationship with God at best, is distant
Iâ€™ve been in pain, he never came to my assistance
Agnostic now, though I was raised Christian
Genocide and poverty made me question his existence
For me to be on this track is hypocritical
But on the flipside I do feel spiritual
Way beyond religion, far past the church
I give praise and respect for the creation of earth
With very little knowledge of the maker or keeper
I pray to get me close, meditate to get me deeper
Investigate to find weâ€™re vibrations in the ether
Taking a leap of faith trying to reach a
Better sense of self but it ends being exhausted
No feeling after this besides being in a coffin
Even believing the talking of Stephen Hawking
Big bang with no God for me to see beyond it

Chorus

Verse 2

Rally round the other side; transform to a whole new demon, a whole new parasite. A shoulda follow my mind but I got blind side by the thought that I could do right; and jump off to a new life. But in hind sight, it was a mess from the day that you said I was bordering the edge of a new fight. It seems clear nowadays Iâ€™m peaceful. My wusas' coming hand over feet do. My peers tell me i'm rugged and i'm a beast too. Is there any other way that I can please you. Leave a message in the message box please do. I keep thinking I could make it all better yo. But some days things tough without the cheddar yo. Phenomenal rhyme skills make me better though. I'm

being pushed to the edge and a neva know.

Chorus

Intro

Bridge

In another nother life time, I wanna be the lone bass line fi blow yo blow yo damn mind. Thats right. Thats right. Thats right

Chorusx2
