

Closer

Aerosmith

How many times can you turn away
You fall in love and then love falls away
You turn out the love when you turn out the lights
You hit the heavens when you hit the heights How can I turn off the flame you know how it kills me
Every time you say love is gone away, I get closer
It's a give and take every time we break, I get closer
You get closer too I love you baby till death do us part
If love's on a man why not unbreak my heart
You start so many things so why not let's dance
Two times in love or a one time romance How can I turn off the flame you know how it kills me
Every time you say love is gone away, I get closer
It's a give and take every time we break, I get closer
You get closer too And I don't know why we fight
What's wrong with always being right
It's always those damndest things, can angels fly on broken wings? And every night when I'm alone in bed
I still smell your perfume
Then I wake up and I swear, I swear
I still remember Every time you say love is gone away, I get closer
It's a give and take every time we break, I get closer
Every time you say love is gone away, I get closer
You get closer too
