

Straight To Your Heart

Bad English

I cant reach behind your eyes
You always look away
You hide behind your alibis
And change your mind
From day to day If theres something I can do
Then Ill be there
Outside your broken world
Youll see, its me who cares Take me straight to your heart
'Cause this times real and real lasts forever
I know, where you are
'Cause you know, Ive been there before
Straight to your heart I watch you move
And I watch you dance
I watch you drift away
And Id give anything for you
And you know thats bad
When it gets that way You cant go on like this
And I dont wanna fight again
I dont give a damn anymore
Right or wrong youre gonna let me in Straight to your heart
'Cause this times real and this time's forever
I know where you are
'Cause baby, Ive been there before
Straight to your heart, this time, this time Baby, I know where you are
'Cause you know, Ive been there before
Then maybe Ill break down the walls
And my love will go straight to your heart Inside, take me inside
Yeah, straight to your heart
'Cause this times real and real lasts forever
I know where you are
'Cause this time were goin all the way Straight to your heart, this time, this time
Baby, its straight, yeah, yeah, yeah, yeah
This time its straight to your heart
Oh yeah, 'cause this time its real
