All Over Me

Paul Brandt

I can tell by the way that she's all over him
She must be all over me
And the tales I've been told I am finally believing
I can't deny what I see
This old barroom is full of suspected surprises
Just like they said it would be
And I can tell by the way that she's all over him
She must be all over meI guess I should have known by the way she's been acting
This is just how it would be
All I ever wanted was her love everlasting
Looks like she wants to be free
And I can tell by the way that she's all over him
She must be all over meI'm standing here and my heart goes to pieces
Along with all of my dreams
She's on the dance floor with her arms tied around him
I wish they were wrapped around meI guess I should have known by the way she's been acting
This is just how it would be
All I ever wanted was her love everlasting
Looks like she wants to be free
And I can tell by the way that she's all over him
She must be all over meShe must be all over, it must be all over
She must be all over me
