

Good Women Do

Little Green Cars

i spend all my time
trying to break you down
why won't you just die
it's always on my mind you're so insecure
with your high-heels and your shortest skirt
i could never wear that
take a fucking photograph i can't remind
myself if i want to be alright
i'm changing white
you know that i love to be so contrived
you're my main event
i hate you that does not mean obsessed
a dog chewing its own bones
and i won't ever go home i can not decide
if it's you i hate or something inside
for now i'll stick with you
it's wha good women do
i can't remind
myself if i want to be alright
i'm changing white
you know that i love to be so contrived
